

Handheld Calibration Test Hand Pump

HA-PU
HA-PUK

Hand Pump

Standard Versions

The ITIUK handheld calibration test pump kit offers high accuracy, reliability and flexibility. Available for use with 0-25 bar or 0-40 bar pressure gauges (both also offering 0.9 bar vacuum).

Available as a stand alone unit (HA-PU), complete with analogue or digital gauges or in a complete cased kit (HA-PUK)

Weight
0.75kg

Dimensions
230 x 130 x 65mm

Features

- Combined pressure and vacuum calibration pump
- Compact, lightweight and simple to use
- Generates any pressure up to 40 bar (600psi)
- Generates any vacuum up to -0.9 bar (-28.5 inHg)
- Precision vernier control for accurate adjustment
- Comfortable, ergonomically designed molded handle
- Adjustable stroke
- Includes 1 metre flexible nylon hose and 1/4" BSP adapter
- Pneumatic design - requires no oils or liquids

Availability Options

Standalone handpump includes:

- Pneumatic handpump
- 1 Metre flexible nylon hose
- 1/4" BSP (female) adapter

Additional gauges available:

- DPG with 0.5% or 0.25% accuracy
- 0-4 Bar, 0-6 Bar, 0-10 Bar 0-16 Bar, 0-25 Bar, 0-40 Bar
- 1-0 Bar vacuum

All digital gauges offer selectable units of measurement:
Bar, psi, in. Hg (for vacuum range only) kPa, MPa, kgcm²

Full handpump kit includes:

- 1 Meter flexible nylon hose
- Pneumatic handpump
- 1/4" BSP (female) adapter
- Professional ABS carry case
- Full set of widely used process connection adapters and set of seals

Complete Kit with Case
