

#### General Information

A range of Surface Resistance Temperature Detectors designed for maximum contact on the surface being measured, ideal for both permanent and temporary temperature measurement in a wide range of applications

#### Description

This range of Surface RTDs are very popular as they can be used on many types of surfaces including uneven and circular surfaces, they are also very simple to use and provide a convenient measurement method for applications where quick connect or disconnect is required. We manufacture these sensors with Pt100 and Pt1000 elements and can be terminated with plain tails or a miniature plug to connect to the ITI Digital Thermometer. As with all of our range these sensors can be manufactured to your exact requirements

#### Stock/Delivery

Ex-Stock

#### Features/Benefits

UK/EU Manufactured

Fast Response

Available in Pt100 or Pt1000

Easy to install

This range offers sensors for use on many applications

Bespoke manufactured options

#### Applications

Temperature mapping

General Surface

Measurement

HVAC

Circular Surfaces

#### Ordering Information, Configurations

- Individual specification sheets and drawings available
- Please email your enquiry or sketch to [sales@itiuk.com](mailto:sales@itiuk.com)

Technical changes, replacements of material and printing errors excepted
